REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Vis-à-vis the broadest independent claim 1, Koshishiba et al '585 is the best reference of record. Despite the closeness of the two inventions, the patent in consideration fails to teach or fairly suggest the utilization of a combination of **an objective lens having a high magnification and more than one array of detectors** in an inspection apparatus, the distinctive feature now called for in claim 1. The patent makes no mention of a high magnification for the objective lens used; and only one array of detectors is used in the inspection operation. The advantage of having more than one array of detectors is indicated on page 3 of the specification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
